## Biamp (Apart Audio) CM1008-BL

### TECHNICAL DATA

|                     |                                                                                   |
|---------------------|-----------------------------------------------------------------------------------|
| Frequency response  | 50 Hz – 20 kHz ( $\pm 3$ dB)                                                      |
| Frequency range     | –                                                                                 |
| Power               | 60 W (RMS)                                                                        |
| SPL                 | maximum 107 dB (1 m)                                                              |
| Sensitivity         | –                                                                                 |
| Impedance           | 8 $\Omega$                                                                        |
| Dispersion          | 180° (vertical, at 1 kHz)                                                         |
| LF components       | 1x 8"                                                                             |
| MF components       | –                                                                                 |
| HF components       | 1x 1"                                                                             |
| Transformer tapings | –                                                                                 |
| Connectivity        | –                                                                                 |
| Dimensions          | 244×90 mm ( $\varnothing \times D$ ); 223 mm ( $\varnothing$ cut-out measurement) |
| Type                | 2-way speaker with polypropylene cone                                             |
